

STTARR - Radiation Work Approval

The STTARR Innovation Centre has a permit for following radioisotopes approved to possess, transfer, store, and use:

Radioisotopes(s)

Ac-225	I-123
Au-198	I-125
Au-199	In-111
Ba-133	Lu-177
C-11	Na-22
Co-57	Pb-203
Cs-137	Pb-212
Cu-64	Tb-155
Cu-67	Tb-161
F-18	Tc-99m
Ga-67	Y-90
Ga-68	Zr-89
Hg-197	

A selection of PET and SPECT radiotracers can be obtained from affiliates or commercial sources:

PET Radiotracers

F-18 FDG
F-18 FAZA
F-18 FCholine
F-18 DCFPyI(PSMA)
F-18 Florbetaben
F-18 Sodium Fluoride (NaF)
F-18 FLT

SPECT Radiotracers

Tc-99m pertechnetate
Tc-99m MDP
Tc-99m HMPAO
Tc-99m DTPA
Tc-99m MIBI

The STTARR Innovation Centre has a permit to possess, transfer, store, and use the following radioisotopes. To confirm their availability, please consult with STTARR team (sttarr.general@uhn.ca).
